17. Please describe any specific aspects of the course and/or teaching practices that your instructor used that created or interfered with a welcoming and supportive learning environment that valued and supported equity, diversity and inclusion.

- .
- Always checked up on us to see how we were doing and that felt very warm and welcoming!
- Professor are always be available in piazza and zoom to help us on questions. His replies are detailed and contains all the information that we should know and we may confused about. His class script are always with description for codes that we run. The class of MGT100 is quite difficult, but I like to listen to his class very much although there are many things I do not understand. I like the materials and readings provided by the professor, and I also like the class materials he prepared. I really learned a lot.
- Professor created an engaging class in zoom and class lecturer which were fun for me to learn.
- Professor Davorsky creates a welcoming environment for his students by going out of his way to try and get to know all students and offer a hand for career advice at all times.

- The Professor conducted the class in a way that facilitated the students learning very well. He always encouraged in class discussions and participation from the students. He always provided a space to where the students felt supported in their learning. H always explained the class material very well, and even though it was challenging material, he always found a way to make the class fun and interesting for everyone which I really appreciate.
- The quizzes were designed in a really student friendly way and it is also really nice that Prof Yavorsky is offering an online and in-person exam option
- Welcomed all questions and responded promptly and cordially.

18. Please describe any specific aspects of the course and/or teaching practices that your instructor used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

- .
- Answered all questions in a manner that allowed easy understanding.
- homework and assignment helped me a lot on understanding the assignment.
- I appreciate the way that the Professor had the class set up. Our twice weekly quizzes and homework were very helpful in our learning experience because we had to put in the effort to understand these concepts at home, with the material we had learned in class. I thought this was really effective in learning everything thoroughly. I also really appreciate how much support the Professor offered the students who felt they needed it. He always offered office hours or answered questions, and in general did a really great job of supporting the class' education.
- Professor Davorsky helps his students learn by answering questions on piazza and being accessible in person for discussion/ asking questions after class/ outside of class time.
- the implementation part in R
- The R-scripts were very helpful in understanding the material especially because they were very detailed about the concepts.

19. Please describe any specific aspects of the course and/or teaching practices that your instructor used that helped you to feel engaged with the course material or that encouraged you to feel that you could succeed in the course.

- .
- As stated before, the Professor supported the students, encouraged participation, made sure everyone felt heard and included, and formatted the class in a way that as long as you attended class and were dedicated to learning, you would understand the material based on the interactive and informative class lectures and homework and quizzes we completed bi-weekly to build of this knowledge from class.
- interaction with class made me feel engaged
- Professor Davorsky emphasizes he doesn't want his students to fail and gives resources as to how we can learn and succeed in this course.

- Provided real life examples.

20. Please describe any specific aspects of the course and/or teaching practices that your instructor used that were less helpful for your learning. Optionally you may offer constructive suggestions that might improve their effectiveness.

- .
- none as all materials were easy to understand.
- There was nothing negative I could think to say about this course or Professor, I have the utmost respect for the Professor and his teaching style. He is a great instructor and this was the most positive experience I have had in a class at UCSD thus far.

21. Is there anything else you would like to share about your experience in the course?

- .
- No, it is Perfect.
- quizzes definitely varied in difficulty so difficulty control would be nice. 2 lectures and a weekly discussion class would be nice to go over the code and deepen understanding, just a suggestion. Overall, quality class though.
